

Table S1. Key identifiers of AMI and stroke algorithms

Identifiers	
AMI	ICD codes (I21–I23), ECG, cardiac enzyme (CK-MB, troponin I, troponin T), coronary angiography
Stroke	ICD codes (I63), ICD codes (I60, I61, I64) brain CT, brain MR, brain CT angiography, TFCA, fu brain imaging, Holter, rehabilitation, admission route, death during hospitalization, admission duration ≥ 3 days, transfer to department of rehabilitation, intravenous thrombolysis, endovascular therapy, antiplatelet agents, anticoagulants, change of antiplatelet agents during hospitalization, change of anticoagulants during hospitalization, carotid endarterectomy, carotid angioplasty or carotid artery stenting, intracranial angioplasty or stenting, change of antithrombotics within 90 days after stroke

AMI, acute myocardial infarction; ICD, International Classification of Diseases; ECG, electrocardiogram; CK-MB: creatine kinase-myocardial band; CT, computed tomography; MR, magnetic resonance; TFCA, transfemoral cerebral angiography.
