

Table S2. Planned number of cases for hospital survey

Types of hospitals	No. of hospitals	Algorithm-positive stroke	Algorithm-negative with the ICD codes	Algorithm-negative without the ICD codes	No. of survey cases in stroke	Algorithm-positive AMI	Algorithm-negative with the ICD codes	Algorithm-negative without the ICD codes	No. of survey cases in AMI	Total no. of survey cases
Capital regions										
Tertiary hospital	3	50	5	45	300	50	5	45	300	600
General hospital	4	30	3	27	240	30	3	27	240	480
Hospital	1	30	3	27	60	30	3	27	60	120
Non-capital regions										
Tertiary hospital	3	50	5	45	300	50	5	45	300	600
General hospital	4	30	3	27	240	30	3	27	240	480
Hospital	3	10	1	9	60	10	1	9	60	120
Total	18	600	60	540	1,200	600	60	540	1,200	2,400

ICD, International Classification of Diseases; AMI, acute myocardial infarction.
