

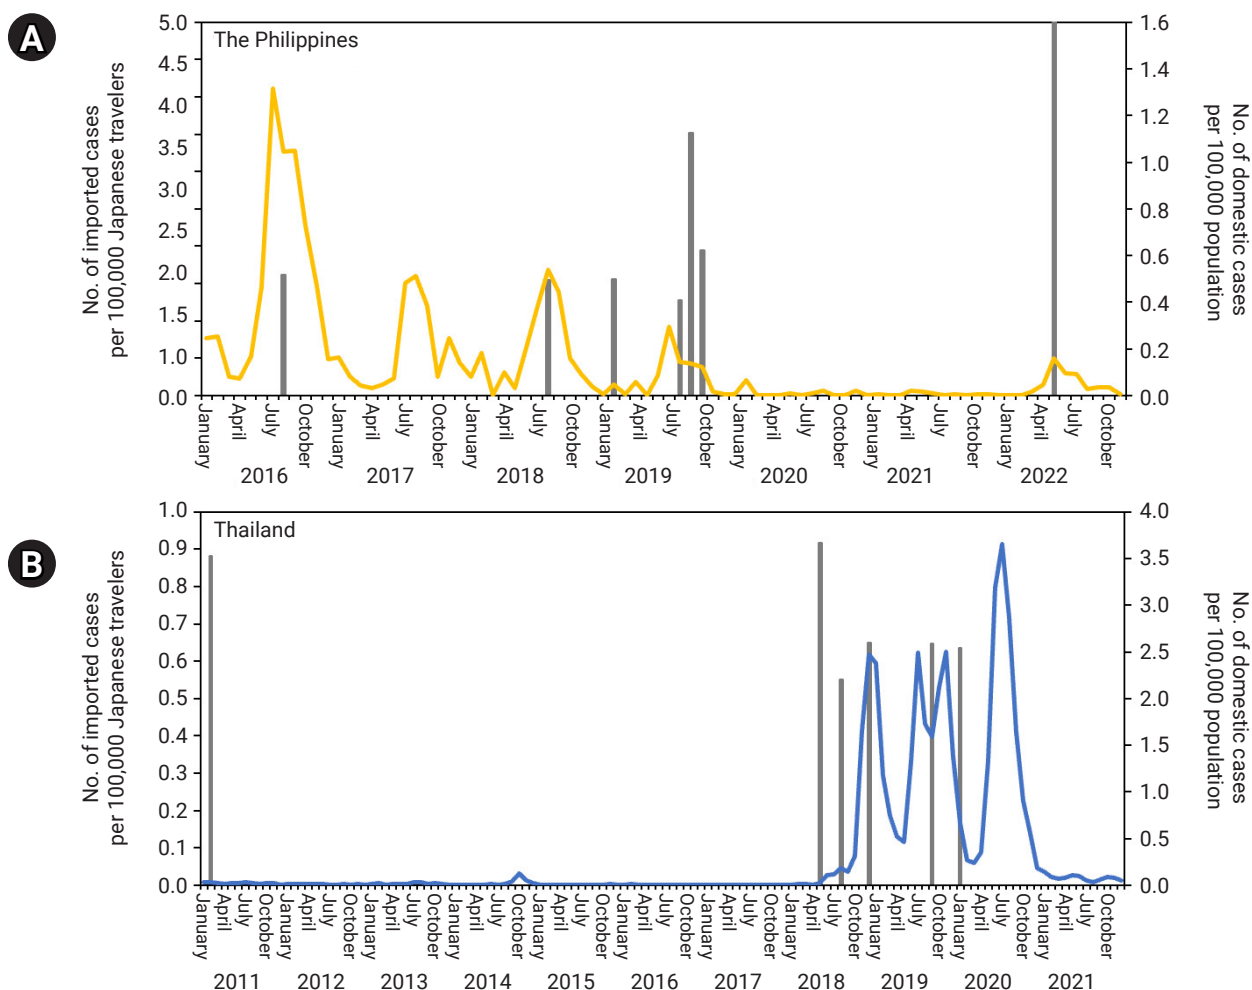

Figure S1. Monthly number of imported chikungunya cases per 100,000 Japanese travelers (bar charts) and monthly number of domestic chikungunya cases per 100,000 population (line charts) for (A) the Philippines from 2016 to 2022 and (B) Thailand from 2011 to 2021. Spearman's test was performed to evaluate the correlation between imported and domestic incidence by month: $\rho=0.26$, $p=0.02$ for the Philippines and $\rho=0.22$, $p=0.01$ for Thailand.
